Summary

Information systems professional with broad experience in security, design, architecture and identity management implementations. Continually excels in the application of evolving technologies to satisfy critical strategic and operational requirements by blending creative and technical abilities.

Experience

HIT Consulting Corp, Miami, FL | 01/00 – Present | Principal Consultant
• Provided architecture, SDLC, Agile and DevOps process and implementation consulting services to public and private sector clients.

JM Family Enterprises, Inc
• Solution Architect and Developer for system and data integrations delivering dealer partner success and growth.
• Refactored and modernized legacy applications into PaaS implementations.
• Developed and maintained continuous integration, testing, deployment and delivery processes.
• Implemented proofs of value for AI services applied to service claim evaluations.

MasTec, Inc
• Performed enterprise content management cloud migrations and developed workflow modernizations.
• Developed software for infrastructure construction management.
• Managed software engineers, project requirements and delivery success.

Ryder System, Inc
• Solution Architect for logistics management systems with responsibilities for concurrent efforts in various stages of funding, analysis and implementation.
• Reviewed and selected technologies, managed vendor relationships and produced implementation cost estimates.
• Led and mentored development & infrastructure teams, technical leads and product owners in adoption of automation techniques for scale, deployment and operations.
• Negotiated for enterprise architecture objectives with novel designs, implementation options and roadmaps.

Miami-Dade County Public Schools
• Implemented hybrid cloud applications and services with federated IdAM for over 500k users.
• Reviewed mobile and web application code base for security vulnerabilities and weaknesses.
• Conducted discovery cases for security compliance audits of cloud storage and mailbox activity.
• Provided SDLC development and SaaS integration of bespoke mobile applications on native iOS and Android.
• Mentored Scrum projects for micro-services, Web APIs, and mobile applications.
• Accelerated functional releases of enterprise identity management systems with particular effectiveness in compliance, user experience and cost reductions.
• Advised and mentored on IdAM implementations and single sign-on processes for on and off premise systems.
• Developed custom management agents for on and off premise services and federated identities.
• Provided process analysis and implementations for security clearance workflows.

Ryder System, Inc
• Designed and implemented portal architecture to conform to existing corporate network and disaster recovery constraints.
• Delivered SAML integrations for web portal implementations.

SGWS (Southern Wine & Spirits of America, Inc)
• Designed portal farm typologies and mentored support and development staff through life cycle phases.
• Integrated and customized portals for various authentication and authorization providers.
